

Robin Goudeketting

SENIOR BACK-END ENGINEER

Profile

I'm all about making sure business and IT speak the same language. I think tech should support what a business wants to do, not the other way around and I get a huge kick from adding real value.

Employment History

Freelance Full-Stack Developer, Assict B.V.

MAY 2025 — PRESENT

Assict helps individuals, businesses, and non-profit organisations with gathering funds for projects. I converted their offline excel based workflows to a digital portal that they use to easily browse their data, including thoughtful filters, and plan the applications they plan on doing.

Full-stack Engineer, Equippo

MAY 2020 — PRESENT

Full-stack engineer and front-end tech lead working on company software, website, third-party integrations, and other tooling.

CTO / Co-founder, Career Basecamp

JUNE 2021 — JANUARY 2025

Building and maintaining a complex web application (front-end & back-end) as well as steering the direction of our product to enhance functionality while organically growing the product from no users to over 1000 users a month.

IT Consultant, Knowledge Values

AUGUST 2018 — DECEMBER 2019

In-depth business logic modeling paired with collaborative knowledge sessions to understand and dissect customer business needs and converting them to directly executable questionnaires for increasing productivity and optimizing processes.

Education

Full-Stack Engineering, Codaisseur

2020 — 2020

Neuroscience & Cognition, Utrecht University

2014 — 2017

Master of Science - GPA 4.0 (average grade 8.3)

Biomedical Sciences, Utrecht University

2011 — 2014

Bachelor of Science
